

**About Spectrum Bridge Inc.**

Spectrum Bridge, Inc. (SBI) delivers software and services to wireless service providers and equipment manufacturers to enable wireless networks and devices access and use of all types of spectrum and networks at any place or time via a database driven cognitive network architecture. The Company's products are embedded in subscriber devices and network equipment to more efficiently allocate bandwidth throughout the entire wireless network. SBI's technology provides customers greater capacity, coverage and utilization of spectrum and network resources. Named to Fierce Wireless' "Fierce15" as one of "the most innovative and smart emerging companies in the wireless industry", the company is privately held and headquartered in Lake Mary, Florida.
