

Spectrum AUCTION

Bidding to Open on:
Multiple Florida Licenses

Part 22 VHF Spectrum

SpecEx.com has the dynamic capability to host live online spectrum auctions for its customers. Licensed spectrum holders take advantage of our unique technology and leverage the massive pool of qualified spectrum buyers within SpecEx. This provides another avenue and opportunity for license holders to optimize the value of their spectrum licenses.

Through the SpecEx platform, **Spectrum Bridge, Inc.** will soon host an online spectrum auction. Featured in the upcoming event will be:

Very High Frequency (VHF) spectrum licenses covering 78 counties in Florida and South Georgia

This spectrum is highly desirable due to its geographic coverage and the wide availability of compatible analog and digital radio equipment from leading vendors.

For more auction information, specific call signs, complete prospectus, or other license details, please call **1-866-598-7426**, **(407) 792-1570 x521** or email sales@SpecEx.com

PRIVATE SPECTRUM AUCTION

Licenses cover the majority of 7 BEAs across FL

Interested parties can bid statewide, or only on portions needed

Applicable rules and regulations are defined in 47 CFR Part 22, Subpart E.

Additional details covered within prospectus

Permissible Operations

VHF Licenses State of Florida

Market-based paging spectrum rules allow users to construct base stations and deploy mobile users, with no regulatory limits on the number of users deployed throughout a market area.

In addition, no requirements exist to register individual site installations (as with site-specific licenses), simplifying administration and fostering flexibility.

Be sure to contact Spectrum Bridge, Inc. for a copy of the white paper entitled "Addressing Part 90 Spectrum Scarcity."
